Farmers, Look!

The important feature of any transplanter is the valve mechanism. Examine the Improved Tiger. The valve on this transplanter has a flat rubber cut-off and 1 1/4 hose that insures plenty of water. The Tiger makes the farmer absolutely independent of the weather. He sets his tobacco when he gets his ground ready and it makes no difference whether the soil is dry or moist. This machine was designed primarily for the purpose of enabling the farmer to transplant, irrespective of reasonable conditions. At the same time, it is constructed to make planting more rapid and accurate. You can't go wrong in buying a Tiger. They will "deliver the goods." If you are too busy to come in, phone us and we will give you the names of some of your neighbors who are delighted Tiger owners.

MIKE BROWN,

THE
SQUARE DEAL MAN.

Rev. M. S. Clark returned home from Moorfield, Saturday night. Rev. Clark has been holding quite a successful meeting at the M. E. Church South in Moorfield. He had fifteen additions to the church, and many conversions. The house and surrounding church yard were filled nightly to hear the glad tidings.
